Rayen Chemlali

SUMMARY

I am an engineering student at INSAT, passionate about competitive programming, AI, and software development. Actively participating in competitive programming contests and AI hackathons, I constantly learn and adapt to new challenges. With a solid foundation in multiple technologies and a strong drive to grow, I aim to leverage my skills in dynamic environments and make meaningful contributions.

KEY SKILLS

- **Programming Languages:** Java, Python, C++, JavaScript, PHP, Go
- **Frameworks & Libraries:** ASP.NET, NestJS, Symfony, React, Next.js, Angular
- **Data Science & Machine Learning:** NumPy, Pandas, Scikit-learn, TensorFlow, RAG, NLP, Computer Vision, Supervised & Unsupervised Learning
- **Software Development & Tools:** Relational and Non-relational Databases, Git, Linux, UML, Design Patterns, Docker, CI/CD

PROFESSIONAL EXPERIENCE

Plug & Tel

November 2025 — Present *Part-Time Software Engineer*

Working as a part-time software engineer, contributing to software development projects and applying technical skills in a professional setting.

Talan Tunisie Consulting

June 2025 — August 2025 *Summer Intern*

Designed and developed the first phase of the Smart Container Registry to optimize Docker storage costs, including a conversational chatbot, unified Kubernetes/S3 dashboard, and customizable deletion rules.

Talan Tunisie Consulting

July 2024 — August 2024 *Summer Intern*

Developed an HR Management Application using NestJS and React, focusing on user experience optimization and security.

Centre Informatique du Ministère des Finances

July 2023 *Summer Intern*

First internship in maintenance service, introduction to the professional world.

Freelance

Various Dates *Software Developer*

Worked on two freelance projects:

- AI-powered business strategy copilot with chatbot and graph visualizations, generating diagnostics, financial projections, and market analysis with PDF/pitch deck exports.
- Shannon: Co-developed a graph-based code generation tool inspired by model-based design tools (e.g., Simulink) as a free alternative, featuring an interactive canvas for block and link modeling with integrated code generation engine.

EDUCATION

National Institute of Applied Sciences and Technology *2022 - Present*

Fourth year in Software Engineering

Baccalaureate in Mathematics, Tunisia *2022*

High Honors

LANGUAGES

- **Arabic** — Native
- **French** — Fluent
- **English** — Good level
- **Spanish** — Beginner

CERTIFICATIONS

- Supervised Machine Learning (Coursera)
- Advanced Learning Algorithms (Coursera)
- Efficient LLM Customization (NVIDIA)
- Building RAG Agents with LLMs (NVIDIA)
- Samsung Innovation Campus AI Program

ACHIEVEMENTS

- 2nd Place - Code Quest 2023 at INSAT
- Bronze Medal (11th) - TCPC 2024
- 3rd Place - "AI 4 New Generation" Hackathon by EY & Université Ibn Khaldoun, 2024
